COLOUR OVERVIEW & PRICELIST SUNBRELLA® (DECORATIVE) CUSHIONS & POUFFES

(DECORATIVE) CUSHIONS SUNBRELLA® (NATTÉ) without valance

	-10020	-10030	- 10059	-10068	-10205
K5S25	decorative cushion	50x50cm	white/sooty/dark taupe/caillou cocoa	€ 119,-	
MKS211	decorative cushion	50x50cm	gaillette reseda	€ 120,-	
K5S26	decorative cushion	50x35cm	white/sooty/dark taupe/caillou cocoa	€ 129,-	
MKS210	decorative cushion	50x35cm	gaillette reseda	€ 120,-	

SUNBRELLA®

All Sunbrella® cushions & pouffes are made to measure to provide extra comfort and the fabric is a washable Sunbrella® polyacrylate. Sunbrella is dyed completely, is UV-resistant, colourfast, water and dirt repellent, antifungal and is able to withstand water from swimming pools and seawater.

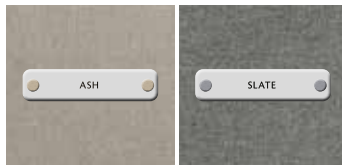

In the pricelist you can see which cushions are standard available for each product. Other Sunbrella® colours are available to order for a surcharge.

ALL WEATHER

All the fabrics used by MAX&LUUK for all weather cushions are particularly suitable for outdoor use. These fabrics are stitched with special yarns, making it virtually impossible for water to penetrate to the filling. The comfortable filling is also provided with an almost waterproof and breathable cover, designed especially for MAX&LUUK. The following lounge collection is delivered with **Sunbrella® all-weather cushions** as standard: Mike modular lounge. All other cushions are also available in all weather fabric for a surcharge.

MAINTENANCE ADVICE: we advise using Fabric Cleaner to clean the fabric. After cleaning, the fabric can be given extra protection using Fabric Protector.

DRALON®

Dralon® is a weather resistant fabric, perfect for sunny outdoor spaces such as the garden, deck or patio. By the Teflon stain-proof finishing, the fabric is well protected against dirt, grease, liquids and deposits of dust.

CERVO

Cervo feels soft and has a lot of texture, which is why the fabric gives the outdoor furniture an extra luxurious look. Thanks to the special treatment, the material is water and dirt repellent.

PRATO

Prato is a textured linen look outdoor fabric with a soft touch. The polypropylene material is resistant to fungus and bacteria. It is very high UV-resistant and has excellent light fastness. Prato is non-absorbent and withstands water from swimming pools and seawater.

In the pricelist you can see which cushions are standard available for each product. Other Dralon®, Cervo and Prato colours are available to order for a surcharge.

ALL WEATHER

All the fabrics used by MAX&LUUK for all weather cushions are particularly suitable for outdoor use. These fabrics are stitched with special yarns, making it virtually impossible for water to penetrate to the filling. The comfortable filling is also provided with an almost waterproof and breathable cover, designed especially for MAX&LUUK. The following lounge collections are delivered with all-weather cushions as standard: **Duke/Mason/Mick & Mike modular lounge.** All other cushions are also available in all-weather fabric for a surcharge.

MAINTENANCE ADVICE: we advise using Fabric Cleaner to clean the fabric. After cleaning, the fabric can be given extra protection using Fabric Protector.

 Protection cover, inclusive extending pole, for parasols maximum Ø 400cm/300x300cm and side post parasols Vince and Logan.

BELT/ROPE

Belt and rope are durable, innovative and strong materials to use for the weaving of outdoor furniture. They are stylish, unique and have a soft touch, creating comfortable seating and stunning looks. The versatility of these materials in combination with various weaving techniques applied on powder coated aluminum- and galvanised steel results in exciting and contemporary designs. Belt and rope are made of thermoplastic polypropylene fibers and have been developed to meet all requirements for outdoor furniture. They are engineered to endure extreme outdoor conditions such as sunlight UV exposure, temperatures variances, mold and mildew. Belt and rope are resistant to moisture, are colourfast, do not contain PVC, are washable and require little maintenance.

MAINTENANCE ADVICE: easy to clean with Fabric Cleaner. After cleaning it is possible to further protect the materials with Fabric Protector. Never use a high pressure cleaner.

FIBRE

MAX&LUUK fibre is a polyethylene synthetic wicker that has been developed to meet all standard specifications for outdoor furniture. The fibre is fabricated to endure rigorous outdoor conditions such as sunlight UV exposure, extreme temperatures variances, mold and mildew. It is resistant to moisture, sea water and chlorinated water.

MAINTENANCE ADVICE: easy to clean with Multi Cleaner. A soft nylon brush or a low pressure air hose can also be used to clean between the weaving.

POWDER COATED ALUMINIUM & STEEL

Fluidized powder coating applied to the aluminium & steel structures by electrostatic spray. To ensure the solidity and resistance of the powder coating, the complete structures are stoved at a temperature of about 180° degrees Celsius. These materials are fabricated to endure rigorous outdoor conditions such as sunlight UV-exposure and extreme temperatures variances.

MAINTENANCE ADVICE: easy to clean with Multi Cleaner.

TEXTILENE

Textilene is a woven polyester fibre protected by a PVC coating. The fibres are then melted together in order to obtain an exceptionally solid fibrous substance that is permanent resistant to stretching and immune to cracking. The plastic coating guarantees exceptional resistance to climatic conditions and UV-exposure. The fact that there is no moisture absorption results in quick-drying action and little sensitivity to staining.

MAINTENANCE ADVICE: easy to clean with Multi Cleaner.

POWDER COATED GALVANISED STEEL

This is made from premium metal, which has been treated with hot dip galvanized treatment, which is the strongest treatment you can get. It is fabricated to endure rigorous outdoor conditions such as sunlight UV-exposure and extreme temperatures variances.

MAINTENANCE ADVICE: easy to clean with Multi Cleaner.

FIBERGLASS

Fiberglass is a composite material. Fiberglass mats are combined with resin and the products are shaped by hand in a 3D mold. It takes several days to finish a Nick stool/table (page 10). The combination of strength and low weight makes fiberglass an excellent material to make unique and complex shapes. Fiberglass is a weather resistant material. The Nick products are weighted with concrete so they are weighted to create stability.

MAINTENANCE ADVICE: easy to clean with Multi Cleaner.

RECLAIMED TEAK

Reclaimed teak is (semi) handmade out of old recycled teak wood. It has been reclaimed from various areas in Java. The reclaimed teak we use is what we got from old houses, buildings, bridges, boats, etcetera. Purchasing this product means accepting a crack or a burst, an irregular surface, a different wood structure, and the fact that wood works. The simplicity of nature itself. Teakwood is a close-grain and oil-rich hardwood and is especially stable in its recycled form. Therefore it is the ideal material to produce long-lasting outdoor furniture. The wood has been used before, so has some unique characteristics: we need to use patches in the wood and the wood contains materials that have entered (for example nails). These may cause rust, which may stain in the product itself or cause sedimentation on the floor. The furniture will potentially show stains during aging. This includes minor black spots that occur where nails or bolts were left in the furniture. This will not damage the quality of the wood itself. Wood is a natural product and is subject to external influences. Cracks and change of color are physical facts to be expected. Each piece will age differently and each piece will develop its own unique character. Left outdoor, reclaimed teak will develop a grey patina. Tables/benches 220cm or longer may begin to sag.

MAINTENANCE ADVICE: we recommend that you allow your teak furniture to weather naturally this way and simply clean thoroughly three or four times a year with Teak Cleaner to remove accumulated dirt. Teak is a natural product and is not treated against stains. It will absorb liquids if not sealed (leaves, food, olive oil, drinks etcetera). To protect teak against stains we recommend Teak Protector. Under no circumstances should a power washer be used to clean your product. Treating with teak oil or other preservatives is not necessary; it will not extend the life of your furniture and is purely cosmetic. We do not recommend oiling your furniture. If you intend to store your furniture over the winter, we recommend that you do so in a watertight garden shed or garage. However, we advise that you do not move teak furniture from the garden straight into a heated indoor room for storage, as the sharp differences in temperature and humidity may cause the wood to split.

TEAK

The teak of MAX&LUUK is a special selection of certified sourced teak from West Java and Sumatra. Teak furniture does not require any special maintenance routine or any additional protection apart from occasional cleaning. Left to age naturally outside, teak will gradually change from its original colour to a soft, silver-grey as the pigments in the surface layer of the wood begin to fade away. Every piece of teak has its own character and structure. Small inlays can be used to fill up minor existing imperfections. Teak is a natural material and cracks in the end grain of components, for example legs and laminated tops, may appear due to changes in temperature and humidity and the consequent change in moisture content of the wood. This is normal, especially in heavier components and it will not affect the serviceability of your furniture. Tables/benches 220cm or longer may begin to sag.

MAINTENANCE ADVICE: we recommend that you allow your teak furniture to weather naturally this way and simply clean thoroughly three or four times a year with Teak Cleaner to remove accumulated dirt. Teak is a natural product and is not treated against stains. It will absorb liquids if not sealed (leaves, food, olive oil, drinks etcetera).
